

1805ICT - Human Computer Interaction

ePortfolio Design Brief - Stage 2

Max Mark

Prototype

Prototype is correctly developed and at least 3 examples are included	10
Prototype is sufficient for product and based on research	10

Discussion - User Involvement

Existing approach is described	5
Optimal approach is defined and accurate for project	10

Test Plan

Purpose and goals are clearly defined	1
Participant characteristics are appropriate to project and testing needs	1
Method is correct and appropriate	3
Task list is detailed and adequate for testing	3
Data to be collected is appropriate for testing goals	3
Summary of test results is clear and detailed	3
Pictures and consent forms are included	3
Analysis of results is clear and correctly based on data & recommendations are given based on results	3

Discussion - Accessibility

Appropriate accessibility implications are described	8
Ease of interaction is correctly described, and changes identified	7

Discussion - Domains

Domain implications are accurate and appropriate	8
Opportunities are clearly identified	7

Discussion - Emerging Technology

Product transformation from an emerging technology is clearly and accurately described	7
Opportunities using emerging technology are presented	8

Deduction of up to 5 marks for errors in spelling, grammar, presentation, and document standards

Total Marks	100
